PROJECTS

CareCircle – Family Care Coordination Web App 2026

- Built a family care coordination web app with Next.js, TypeScript, and Better Auth, featuring role-based access (Owner, Coordinator, Member), task assignment, and activity history.
- Designed a relational schema with Prisma ORM and MySQL, including migrations, unique memberships, and indexed queries for tasks, documents, and activity.
- Implemented private document storage on MinIO with server-side access checks and upload validation (size, MIME type, file signature); containerized the stack with Docker Compose.
- Added automated tests with Vitest and enforced code quality with ESLint.

Thesis – SIBI Sign Language Recognition May 2026

- Built a deep learning system to translate SIBI (Indonesian Sign Language) gestures from video, supporting communication accessibility for the deaf community.
- Benchmarked VideoMAE and ViViT transformers via 5-fold cross-validation, best model (fine-tuned ViT-B/16) reached 97.18% accuracy, outperforming ViViT and I3D baselines.

Personal Portfolio Website

- Built a personal portfolio website with React 19, Vite, and Tailwind CSS to showcase projects and experience, deployed on Vercel.
- Added Framer Motion animations and Three.js 3D graphics to the interface, and enforced code quality with ESLint.

Digo – AI Sales Assistant Chatbot for Digital Agency

- Built Digo, an LLM-powered sales assistant chatbot for a digital agency, using Laravel 12 and MySQL for the backend and React (Vite, Tailwind CSS v4) for the web chat widget.
- Integrated Telegram Bot and WhatsApp (Meta Cloud API and Fonnte) via webhooks, with retrieval of services, pricing, and FAQ data to ground Gemini responses.
- Implemented asynchronous processing with Laravel database queues, webhook deduplication, and automatic Gemini model fallback with cooldowns to handle API rate limits.

GERAKIN Jun 2024

- Achieved 3rd place in an internal campus prototype competition, building a computer vision-based game with OpenCV.
- Engineered interactive gameplay to encourage physical exercise in children through real-time motion detection.

CERTIFICATES

AWS Certified Cloud Practitioner Issued Jul 2026 · Expires Jul 2029
Amazon Web Services (AWS)

TOEFL – ITERA English Proficiency Test (InciTe) Apr 2026
Institut Teknologi Sumatera Language Center | Total Score: 513

SKILLS

Programming Languages: JavaScript, TypeScript, Python, PHP, C++, SQL

Web Development: React, Next.js, Node.js, Laravel, HTML5, CSS3, Tailwind CSS, REST API

Mobile Development: React Native, Firebase

Databases: MySQL, PostgreSQL, Prisma ORM, Firebase (NoSQL)

Computer Vision & AI: OpenCV, Machine Learning, Deep Learning, Image Processing

Tools & Platforms: Git, GitHub, Docker, Vitest, ESLint, AWS (Cloud Practitioner), Cisco

Concepts: Object-Oriented Programming (coursework), Data Structures & Algorithms (coursework), Software Development Life Cycle (Waterfall)

UI/UX for Accessibility: Designing for motor impairments (Cerebral Palsy) and deaf education
